

AUTO-PILOT-VERSE

Founder: Shyam Ghosh

Location: Jaipur, Rajasthan, India

Introduction: Our startup is driven by innovation and a commitment to transforming how businesses operate through the power of Artificial Intelligence (AI). Founded by Shyam Ghosh, our company specializes in delivering SaaS solutions that leverage AI Large Language Models (LLMs) to create intelligent, automated, and highly scalable systems for modern enterprises. Our services are tailored to meet client-specific requirements, ensuring maximum efficiency and a seamless integration with existing workflows.

Our Vision:

We aim to empower businesses to discover opportunities, build cutting-edge solutions, and scale efficiently.

With the right mix of AI, automation, and human expertise, we help companies reach new levels of productivity and customer satisfaction.

Core Services:

1 : - AISDR (AI Sales Development Representative): - A cutting-edge AI-powered SDR tool designed to handle the top-of-the-funnel sales process. - Capabilities include:

- * Automated lead engagement via multiple channels (email, chat, calls).
- * Intelligent lead qualification based on dynamic conversation analysis.
- * Real-time integration with CRMs to update lead status.

- * Multi-turn conversation handling to address objections and questions.

- Benefits:

- * Reduce the need for large human SDR teams.
- * Speed up lead qualification and improve conversion rates.
- * Save operational costs while scaling outreach.

- Use Case Example:

* A B2B SaaS company uses AISDR to reach out to 1,000+ prospects weekly with personalized messaging, booking more meetings without increasing staff.

2. : - AI Chatbots for Website Messaging Platforms: - Designed to understand user intent and provide contextually accurate and helpful responses. - Key features:

- * Natural Language Understanding (NLU) for more human-like interactions.
- * Multi-language support for global businesses.
- * Integration with customer support tools like Zendesk, Intercom, or HubSpot.
- * Ability to escalate to human agents when required.

- Benefits:

- * Reduce customer wait times.
- * Provide 24/7 automated support.
- * Improve customer satisfaction scores.

- Example:

* An e-commerce site integrates our chatbot to answer FAQs, track orders, and upsell products during conversations.

3. : - CallSDR (Outbound AI Calling Solution): - Automates outbound calls for lead qualification, follow-ups, and reminders. - Features:

- * Advanced AI voice technology with natural-sounding speech.
- * Script customization per campaign.
- * Automatic lead scoring based on call interactions.
- * Multi-time zone scheduling for global outreach.

- Benefits:

- * Increase call volume without increasing staff.
- * Standardize and improve call quality.
- * Gather better analytics from conversations.

4. : - Reception Assistant (Inbound Call Automation): -

Handles inbound calls with intelligence and efficiency. -

Key features:

- * Intelligent call routing to the right department or person.
- * Appointment scheduling integrated with client calendars.
- * Automated FAQ handling.
- * Support ticket creation for unresolved queries.

- Example:

* A clinic uses Reception Assistant to book appointments, answer general questions, and route urgent calls to doctors.

- Benefits:

- * Reduce manual call handling workload.
- * Improve first-call resolution rates.
- * Enhance customer experience with quick responses.

5. : -Custom Integrations:

- We connect to existing CRM databases, ERP systems, and business tools to create unified workflows.

- Example Integrations:

- * Salesforce, HubSpot, Zoho CRM
- * Slack, Microsoft Teams, Google Workspace
- * Payment gateways, analytics tools

- Benefits:

- * Minimize manual data entry.
- * Enable cross-platform automation.
- * Provide a single source of truth for data.

6. : - AI-Powered Custom Applications: - Build any type of app with AI features, as per client requirements. - Examples:

- * Intelligent document analysis systems.
- * AI-driven recruitment platforms.
- * Predictive analytics dashboards.

Our Process:

1. Discover - Understand client needs through consultations and audits.
2. Build - Design and develop AI-powered solutions customized for each business.
3. Scale - Implement solutions and provide ongoing support to scale operations.

Business Model: We operate through:

Fixed-price projects AND

Subscription models for ongoing services
